

Suffolk Sheep Society, South of Ireland

PEDIGREE SUFFOLK SALE

Ballina Mart

Tuesday 1st October 2024

Sale commences - 11am

All animals veterinary inspected prior to sale

This Sale is fully endorsed by the Suffolk Sheep Society – South of Ireland

VENDORS

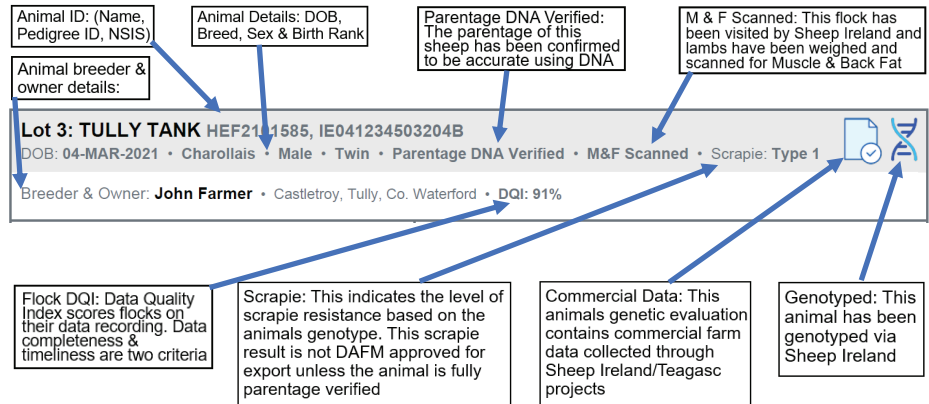

Lot	Vendor
14, 25	Philip Byrne • Limepark House, Windgap, Co. Kilkenny
11-13, 22-24	Eamonn Duffy • Ethelstown, Kells, Co. Meath
5-8, 17-19	John Hanly • Noan Estate, Ballinure, Thurles, Co. Tipperary
4, 16	Michael & Gerry Killilea • Cregcarragh, Claregalway, Co. Galway
1-2, 9-10, 20-21	Declan Mangan • Cloghans Hill, Tuam, Co. Galway
15	Gerard Mangan • Cloonaglasha, Tuam, Co. Galway
3	Michael McDonagh • Tynagh, Loughrea, Co. Galway

€uroStar Evaluation Explanation Page

Important: The Pedigree Information printed in this catalogue is as supplied by or on behalf of the breeder. The responsibility for the accuracy of the information therefore rests solely with the breeder and not Sheep Ireland.

Evaluations should **never be the only tool** you use when selecting animals for breeding. Animals must also be examined to ensure the animal is also physically correct; an animal that is not physically correct (ie. mouth, feet, etc.) cannot compensate for this fault regardless of its evaluation and should be avoided for breeding purposes. See below how to interpret the €uroStar catalogue.

★★★★★ €uroStars – How to interpret them

- Each star represents where the animal ranks on each index in 20% bounds
- **One star** represents the **bottom 20%** of the breed for that trait
- **Five star** represents the **top 20%** of the breed for that trait
- The higher the stars, the higher the predicted profitability of that animal

Animals that only have the outline of a star represent animals that have within flock evaluations, this means the star rating of these animals cannot be compared to any other animals from a different flock.

Rank

- This figure indicates more precisely where the animals rank within the breed. eg. Top 16% (see example below)
- This is displayed with a shaded line, the further to the right these are on the scale, the better its position within the breed.

Acc% (Accuracy%)

- This figure is very important as it represents the amount of data behind each evaluation. Where Acc% is low, much less emphasis should be placed on the evaluation, and vice versa.
- Accuracy is displayed for the Replacement & Terminal Indices. It is not displayed for the four sub-traits. If an animal has high accuracy on Replacement & Terminal, it will be high accuracy across all traits.

Ancestry Information

- 1) Replacement (€3.44)** – If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.
- 2) Terminal (€2.86)** – If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.
- 3) Lamb Survivability** – This ranks animals based on lambing ease and lamb survival rate. Every positive % point on this index is an extra lamb surviving to 40 days and vice versa.
- 4) Days to Slaughter** – This ranks animals on their genetic ability to grow. The index associated with this trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other animals of the same breed.
- 5) No. of Lambs Born** – This ranks animals based on the predicted prolificacy of the females from this animal compared with other animals of the same breed.
- 6) Daughters Milk** – This ranks animals based on the predicted milking performance of their daughters compared with other animals of the same breed.

RamSearch.ie

The Sheep Ireland Online Ram search is also available at ramsearch.ie, you can use this tool to get the most up to date evaluations for a ram, to **search for rams by county, breed and current evaluation ratings.**

Contact Us

Find out more about EuroStar rams, LambPlus or the Online Ram search you can visit www.sheep.ie, E-mail query@sheep.ie, or Call us on 023 882 0451

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial statements. This includes not only sales and purchases but also expenses, income, and transfers. The document provides a detailed list of items that should be tracked, such as bank deposits, checks, and credit card payments. It also outlines the proper procedures for recording these transactions, including the use of double-entry bookkeeping and the importance of balancing the books.

The second part of the document focuses on the preparation of financial statements. It explains how to calculate net income, determine the cost of goods sold, and compute the gross profit margin. It provides step-by-step instructions for preparing the income statement, balance sheet, and statement of cash flows. The document also discusses the importance of reconciling bank statements and the need to review the financial statements for errors and omissions. It concludes by emphasizing the value of accurate financial records in making informed business decisions and ensuring compliance with tax regulations.
